About Me

As someone motivated to specialize in SEO and grow my career in this field, I aim to make strategic contributions to the projects I work on and create sustainable value in the digital world. I have competence in keyword research, content strategy development, technical SEO, and AI-powered SEO solutions. I also have web development experience on Shopify (Liquid) and WordPress/Elementor platforms. By effectively using tools such as Google Analytics, Search Console, Google Ads, SEMrush, and Ahrefs, I perform data-driven analyses and develop strategies to increase website visibility. With a continuous learning and self-improvement mindset, I aim to make a difference in SEO by applying my knowledge to international projects as well.

Experience

SEO Specialist & Shopify/Web Developer, Joykek Digital

September 2025 - Present

- I carry out technical SEO audits, keyword research, and content strategy processes across the agency's multi-client portfolio.
- I build custom theme sections, product pages, and cart experiences through Shopify Liquid development, and perform technical SEO optimization on WordPress/Elementor projects.
- I conduct performance reporting, competitor analysis, and GEO (generative engine optimization / AI search visibility) work based on Google Search Console and GA4 data.
- I accelerate SEO processes (bulk meta description generation, data analysis, etc.) with Python-based automation solutions.
- I produce Turkish and English SEO-friendly content and blog writing.

Jr. SEO Specialist, Simur Digital

July - December 2024

- With my expertise in keyword research, content strategy development, and technical SEO, I made content more effective in search engines.
- By conducting performance analysis, I developed strategies to increase website visibility. The projects I managed achieved 70% first-page visibility on SERPs and an organic traffic increase of more than 50%.
- I contributed to continuous improvement processes to achieve SEO goals.
- I provided support to the web design team on WordPress development.

SEO Specialist - Content Writer, Mita Health Group

November - December 2022

- I took on SEO-friendly WordPress site development and English content creation tasks. I edited all page content of the website in line with SEO criteria, and the effective hook sentences I prepared were also used in social media copy.
- I carried out the website design and technical SEO optimization for the company. With the website renewal, patient feedback and sales increased by 50%.

- I developed data-driven SEO strategies using tools such as SEMrush, Ahrefs, MOZ, Screaming Frog, and SEOquake.

SEO - Digital Marketing Intern, Argo Ajans

August - November 2022

- As part of my internship, which was part of the World Food Programme training, I gained agency experience at this company.
- I actively used WordPress, Google Search Console, Google Analytics, Screaming Frog, and WordPress SEO plugins. I designed WordPress sites tailored to various sectors.
- I contributed to technical SEO and web analytics processes. I carried out content work.
